	4 稳定性及反应性
	稳定性:温度低于 10℃的低温,湿度 70%以下密封储存,储存期为 3个月。
	Stability: stable below 10°C and relative humidity lower than 70% conditions of storage 3 months.
	反应性:温度低于 10℃,湿度 70%以下的冷库条件下密封储存,无明显反应。
	Reactivity: No obvious reactionin refrigeration storagebelow 10°C and relative humidity lower than 70% conditions.
	应避免之条件:材料温度高于 125℃将会产生分解;
	Conditions To Avoid: Material will decompose when temperature ishigher than $125^{\circ}$ C.
	应避免之物质:避免与氧化剂、强酸、强碱性化学性物质及有机试剂接触;注意防尘。 Materials To Avoid: oxidizing agent, strong acid, alkali matter, organic reagent, dust elimination
	有害分解物: 在一般生产条件下未有有害分解物产生。
	Hazardous Decomposition: None at normal processing temperatures.

Page 5/8Property values are typical values. The data provided herein is for information purposes only. Each user of the material should perform their own tests to determine the suitability of the material for their particular application.

General: Warning! During trimming, drilling and milling operations do not create dust cloud. Use collection methods such as vacuum and place into proper container for disposal or recovery.

10 处理办法

## 10 Handling Instruction

处理:采用完善的工业清洁设施,在生产操作过程中尽量减小微尘的吸入量,并充分透气。 Handling: Use good industrial hygiene practices. During trimming, drilling and milling operations minimize inhalation of dusts and contact with skin and eyes. Provide adequate ventilation.

储存:应避开潮湿、热源。

Stage: Store in a dry place away from moisture, excessiveheat sources.
